TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React, Next.js, Tailwind CSS,

Backend: Golang, Echo, Node.js, Express.js, REST API, Redis, MySQL, DBMS, Vegeta

Tools & Technology: Git, Redux Toolkit, Zustand, WebRTC, Server-Sent Events (SSE), Shadcn UI, Ant Design, RTK Query, React-PDF, ApexCharts, Highcharts, Playwright, Vitest, React Testing Library

DevOps: Docker, Google Cloud Platform (GCP)

PROFESSIONAL EXPERIENCE

Vivasoft Limited, Software Engineer L-1 – Dhaka, Bangladesh

Aug. 2024 – Present

- **Kothon CX Suite (Front-end)** – Engineered a comprehensive call analytics dashboard with real-time sentiment scoring, top-topic insights, and dynamic volume visualizations to drive data-driven customer service decisions.
- Developed an interactive outbound campaign manager integrated with WebRTC APIs, enabling real-time AI test calls with dynamic payload synthesis for efficient pre-campaign validation.
- Optimized client-side performance by building a scalable CSV upload engine with bounded history stack, delivering responsive undo/redo and bulk error resolution.
- **Kothon Calls (Front-end)** – Led development of centralized outbound call campaign management and voice agent management platform.
- Implemented Server-Sent Events (SSE) to deliver real-time updates on campaign details and progress.
- Built a real-time full-duplex audio engine using WebRTC and Web Audio API with configurable VAD.
- Developed a multi-step campaign creation workflow with CSV upload, data preview, and customizable question setup.
- Developed an AI voice platform to create and manage agents with customizable voices, model integration, and real-time testing capabilities.
- Technology: TypeScript, React, SSO, Tanstack Table, Tailwind CSS.
- **Maxis Invoice (Front-end)** – Developed a PDF generation pipeline using Next.js API routes, serving generate and upload **9M+** monthly billing statements to GCP.
- Developed asynchronous document validation, bulk TIN verification, and SAP XML-to-JSON transformation.
- Built a real-time analytics dashboard and improved system performance with RTK Query migration, audit logging.
- Technology: Next.js, TypeScript, Redux Toolkit, Tailwind CSS, Ant Design, React-PDF, ApexCharts, GCP
- **Vivasoft ATS (Front-end)** – Built a scalable multi-tenant branch management module
- Improved applicant search accuracy by fixing data validation, query handling, and workflow mapping issues.
- Technology: Next.js, React, TypeScript, Tailwind CSS

Vivasoft Limited, Software Engineer Intern – Dhaka, Bangladesh

Sep. 2023 – Feb. 2024

- Developed key features for **Vivasoft Contact Management**, an **Electron** + React application, including record creation, updating, merging, reusable data tables, and dashboard layouts using **TypeScript** and **Tailwind CSS**.
- Built secure authentication flows (Login, Sign-Up, Reset Password) with robust form validation using react-hook-form and schemas for reliable API integration.

PROJECTS

ChatGPT Enhancer | *TypeScript, React, Plasmio*

Built a Chrome extension with collapsible responses, timeline navigation, and bulk message controls to organize long ChatGPT conversations, achieving **160+** active users.

avro-bangla-suggestions | *TypeScript, React*

Lightweight npm package providing a React hook for real-time Avro phonetic Bangla suggestions and autocomplete with keyboard navigation and minimal bundle size.

EDUCATION

UNIVERSITY OF RAJSHAHI

B.Sc. in Information and Communication Engineering

Rajshahi, Bangladesh

Jan. 2019 – July 2024
