Technical Skills

Frontend: JavaScript, TypeScript, React, Next.js, Tailwind CSS,

Backend: Golang, Echo, Node.js, Express.js, REST API, Redis, MySQL, DBMS, Vegeta

Tools & Technology: Git, Redux Toolkit, Zustand, WebRTC, Server-Sent Events (SSE), Shadcn UI, Ant Design, RTK Query, React-PDF, ApexCharts, Highcharts, Playwright, Vitest, React Testing Library

DevOps: Docker, Google Cloud Platform (GCP)

Professional Experience

Vivosoft Limited, Software Engineer L-1 – Dhaka, Bangladesh

Aug. 2024 – Present

- **Kothon AI Suite (Front-end)** – Engineered campaign creation pipeline enabling automated outbound outreach with bulk CSV lead ingestion, dynamic conversation flow builders, precision call scheduling, intelligent agent allocation with live behavior testing.
- Engineered a comprehensive call analytics dashboard with real-time sentiment scoring, top-topic insights, and dynamic volume visualizations to support data-driven customer service decisions.
- Built real-time communication systems using Server-Sent Events (SSE), WebRTC, and Web Audio API, enabling live campaign progress updates, AI test calls, full-duplex audio streaming, and configurable Voice Activity Detection (VAD).
- Developed an AI voice agent platform with customizable voices, model integration, real-time testing capabilities, and dynamic payload synthesis for efficient pre-campaign validation.
- Technology: TypeScript, React, Tailwind CSS, TanStack Table, WebRTC, Web Audio API, SSE, SSO.
- **Maxis Invoice (Front-end)** – Developed a PDF generation pipeline using Next.js API routes, serving generate and upload **9M+** monthly billing statements to GCP.
- Developed asynchronous document validation, bulk TIN verification, and SAP XML-to-JSON transformation.
- Built a real-time analytics dashboard and improved system performance with RTK Query migration, audit logging.
- Technology: Next.js, TypeScript, Redux Toolkit, Tailwind CSS, Ant Design, React-PDF, ApexCharts, GCP
- **Vivosoft ATS (Front-end)** – Built a scalable multi-tenant branch management module
- Improved applicant search accuracy by fixing data validation, query handling, and workflow mapping issues.
- Technology: Next.js, React, TypeScript, Tailwind CSS

Vivosoft Limited, Software Engineer Intern – Dhaka, Bangladesh

Sep. 2023 – Feb. 2024

- Developed key features for **Vivosoft Contact Management**, an **Electron** + React application, including record creation, updating, merging, reusable data tables, and dashboard layouts using **TypeScript** and **Tailwind CSS**.
- Built secure authentication flows (Login, Sign-Up, Reset Password) with robust form validation using react-hook-form and schemas for reliable API integration.

Projects

ChatGPT Enhancer | TypeScript, React, Plasmio

Built a Chrome extension with collapsible responses, timeline navigation, and bulk message controls to organize long ChatGPT conversations, achieving **160+ active users**.

avro-bangla-suggestions | TypeScript, React

Lightweight npm package providing a React hook for real-time Avro phonetic Bangla suggestions and autocomplete with keyboard navigation and minimal bundle size.

Education

UNIVERSITY OF RAJSHAHI

B.Sc. in Information and Communication Engineering

Rajshahi, Bangladesh

Jan. 2019 – July 2024
